September 2, 1998

SUBJECT: EVALUATION OF THE SOUTHERN NUCLEAR OPERATING COMPANY, INC.
 (SNC) RESPONSE TO NRC GENERIC LETTER 97-05 FOR VOGTLE ELECTRIC
 GENERATING PLANT (VOGTLE), UNITS 1 AND 2 (TAC NOS. MA0506 AND
 MA0507)

Dear Mr. Beasley:

The NRC staff has completed its review of SNC's response to NRC Generic Letter (GL) 97-05, "Steam Generator [SG] Tube Inspection Techniques." The focus of GL 97-05 was to verify that licensees' SG tube inspection practices were consistent with existing regulatory requirements and plant licensing bases. SNC submitted a response to this GL on March 3, 1998, that included a description and technical basis for all inspection techniques used to size the depth of SG tube degradation at Vogtle, Units 1 and 2. The NRC staff's review of this response did not identify any concerns with the SG tube inspection techniques employed at Vogtle that would indicate that SNC is not in compliance with the current licensing basis for the Vogtle facility.

Sincerely,

ORIGINAL SIGNED BY:

David H. Jaffe, Senior Project Manager
 Project Directorate II-2
 Division of Reactor Projects - I/II
 Office of Nuclear Reactor Regulation
