Dear Mr. Sieber:

SUBJECT: BEAVER VALLEY POWER STATION - LOCATION OF THE TECHNICAL
SUPPORT CENTER (TAC NOS. 45925 AND 62877)

This is in response to your letters of November 3, 1986 and April 15, 1983, (both submitted under the Unit 1 docket) with regard to an exception to the location requirement for the Technical Support Center (TSC), and your retraction of a commitment to provide an alternate TSC near the control room.

We have reviewed your responses as well as the results of the Emergency Preparedness Implementation Appraisal (Inspection Report No. 50-412/87-14) conducted at Beaver Valley Unit 2 on March 2-6, 1987. Based on this review, you are hereby advised that we find your compensatory measures to be adequate and approve an exception to the TSC location requirement of Supplement 1 to NUREG-0737. Further, in view of these compensatory measures, we find that there is no need to establish an alternate TSC near the control room.

This approval only applies to the location of the TSC, and your retraction of the commitment for an alternate TSC near the control room. Approval of the other features of the TSC, as well as the approval of the other emergency response facilities will be determined during a post-implementation appraisal to be conducted by the NRC. You will be contacted by Region I personnel with regard to scheduling this appraisal.

This review was performed by Mr. Edward Williams.

Sincerely,
original signed by

Peter S. Tam, Project Manager
