

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION  
RELATED TO AMENDMENT NOS. 114 AND 117 TO  
FACILITY OPERATING LICENSE NOS. DPR-24 AND DPR-27

WISCONSIN ELECTRIC POWER COMPANY  
POINT BEACH NUCLEAR PLANT, UNIT NOS. 1 AND 2  
DOCKET NOS. 50-266 AND 50-301

1.0 INTRODUCTION

In a letter dated January 19, 1988, Wisconsin Electric Power Company (the licensee), submitted an application for amendment for the Point Beach, Units 1 and 2, operating licenses. The proposed amendments would make numerous administrative changes to the Technical Specifications (TS). Such changes include correction of misspelled words, inclusion of more complete and accurate TS Bases, revision of TS numbering, revision of TS references, and revisions to achieve format consistency with other TS.

2.0 EVALUATION

The licensee's proposed changes to the Point Beach, Units 1 and 2, Technical Specifications consist of 10 administrative changes to the current TS. Each proposed change, as identified in the licensee's January 19, 1988 letter, is evaluated below.

Change 1 would revise the Basis of TS 15.3.5 to provide a more complete and accurate description of the subcooling instrumentation and the various methods available to assess subcooling margin. The methodology used to assess subcooling margin is not changed by the proposed amendment, therefore, this change is acceptable.

Change 2 revises the wording of TS Table 15.3.5-1, Item 5, Setting Limit, to be consistent with the Setting Limit wording for Item 6 of the same table. No changes in the setting limits themselves is made; therefore, the proposed change is acceptable.

Changes 3, 4, 5, and 10 correct misspelled words in various TS and are acceptable.

Change 6 deletes the reference to "Appendix A" of 10 CFR Part 55 contained in TS 15.6.4.1. This change reflects the recent reorganization and reissuance of Part 55, as discussed in 51 FR 9453, in which "Appendix A" was incorporated into the body of Part 55. The proposed change is acceptable.

Change 7 revises the numeric designations of TS 15.6.5.3, 15.6.5.4 and 15.6.5.5 to TS 15.6.5.2, 15.6.5.3, and 15.6.5.4, respectively, to establish sequential numbering of TS Section 15.6.5. The proposed change is acceptable.

Change 8 changes the word "audit" to the word "review" in TS 15.6.5.5. The proposed change would make the wording of the TS consistent with 10 CFR 50.54(4), which specifies the use of "review." The proposed change is acceptable.

Change 9 modifies the Reference (2) to TS 15.7.5 to read "FSAR, Section 2" to reflect the deletion of Appendix 2A from the Final Safety Analysis Report. The proposed change is acceptable.

The staff has reviewed the above changes and concludes that these changes are administrative in nature and have no effect on safety, and are, therefore, acceptable.

#### ENVIRONMENTAL CONSIDERATION

These amendments relate to changes in recordkeeping, reporting, or administrative procedures or requirements. Accordingly, the amendments meet the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(10). Pursuant to 10 CFR 51.22(b) no environmental impact statement or environmental assessment need be prepared in connection with the issuance of the amendments.

#### CONCLUSION

The staff has concluded, based on the considerations discussed above, that (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations, and the issuance of the amendments will not be inimical to the common defense and security or to the health and safety of the public.
