Gentlemen:

UNITS 1 and 2

This letter confirms the dates of February 10-14, 1986 for the continuation of the NRC equipment qualification (EQ) inspection of Sequoyah Nuclear Plant, Units 1 and 2. These dates were established during a telephone conversation on February 4, 1986 between Mr. J. Wills of your staff and Mr. G. Hubbard, IE. This inspection is a continuation of the EQ inspection activities started January 6-17, 1986 and it is expected that the inspection team will return at a later date to complete the inspection. The inspection will include concurrent visits to your corporate offices in Knoxville, Tennessee, and to the plant site in Daisy, Tennessee.

A formal entrance meeting is not scheduled; however, a management inspection status meeting is tentatively scheduled for 11:00 a.m. on February 14, 1986 at the plant site. Arrangements for members of the inspection team who will be visiting the plant site have been made with J. Wills.

Your cooperation with us during this continuing inspection will be appreciated. Should you have any questions regarding this inspection, you can contact Mr. G. Hubbard at (301) 492-9759 or Mr. A. Ruff, RII, at (404) 331-4849.
