Subject: ECOSAFET[™] HIC-55 High Integrity Container Topical Report Submittal

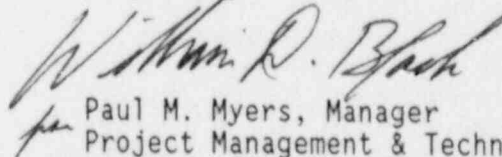

Dear Derek:

Following our meeting on March 30, 1988, draft copies of the subject report were delivered for your initial review. Based on our discussion at the March 30th meeting, and subsequent conversations, it was decided that a revision of the subject report which addressed the fifty-five foot burial depth, would be submitted. The purpose of this letter is to submit the final copies of the subject report. Accordingly, enclosed are ten (10) proprietary and five (5) non-proprietary copies of Babcock & Wilcox Topical Report BAW-2037.

The previously submitted reports should be destroyed and replaced with the version included in this submittal. Babcock & Wilcox requests in accordance with 10CFR2.79 that the base report be considered proprietary. Information supporting this request is included in the affidavit that was submitted with the earlier draft version of the subject report.

Pursuant to 10CFR170.12, an application for check in the amount of \$150.00 was previously remitted.

Very truly Yours,

Paul M. Myers, Manager
Project Management & Technical Services
Waste Technology Services
