Carolina Power and Light Company  
ATTN: Mr. E. E. Utley  
Senior Executive Vice President  
Power Supply and Engineering  
and Construction  
P. O. Box 1551  
Raleigh, NC 27602

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-325/88-06 AND 50-324/88-06

Thank you for your response of April 8, 1988, to our Notice of Violation, issued on March 10, 1988, concerning activities conducted at your Brunswick facility.

In your response, you admitted violation Examples 1 through 3 and Example 5, and partially denied Example 4. Subject to a future review of supporting records, we concur with your partial denial of Example 4.

Your response to Example 5 states that numeric limits for abnormal or erratic data (stroke times) will be established by an Engineering Evaluation Report (EER) but it is not clear how the limits will be established. Based on a telephone conversation between Messrs. Wheatley and Enzor of your staff and Mr. Girard of our staff on April 14, 1988, we understand that the limits to be established by EER should not be confused with the  $\pm 25/50\%$  limits in your response and that, as further clarification, you will provide a copy of the associated EER to this office by May 3, 1988.

We appreciate your cooperation in this matter.

Sincerely,

|S|

Alan R. Herdt, Chief  
Engineering Branch  
Division of Reactor Safety
