SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION
DOCKET NOS. 50-445 AND 50-446
APPLICATION OF LOW SULPHUR CONTENT A588 STEEL
SDAR: CP-85-51

Dear Mr. Johnson:

On December 6, 1985, we verbally notified your Mr. S. Phillips of a deficiency regarding the improper segregation, control and application of low sulphur content A558 steel used in the fabrication of pipe whip and moment restraints. This is an interim report of a potentially reportable item under the provisions of 10CFR50.55(e). We have submitted an interim report logged TXX-4664, dated January 6, 1986. Our evaluation to date has revealed no condition adverse to safety.

We are continuing our evaluation and anticipate completion of our final report by March 7, 1986.

Very truly yours,

A handwritten signature in cursive script that reads "W. G. Council".
