Gentlemen:

Subject: Docket No. 70-1151 - Update of Physical Security Plan

The Westinghouse Electric Corporation hereby submits a revision updating the Physical Security Plan for the Commercial Nuclear Fuel Division's Fuel Fabrication Facility located near Columbia, South Carolina. This submittal is in response to "current practice" issues raised by your Inspector William Tobin in Inspection 98-04; and, is being made in accordance with the provisions of 10CFR70.32(e), since it does not decrease the effectiveness of the currently approved Security Plan.

The changed Revision Record (enclosed as page x) describes the specific update. In addition, all other pages of the Plan have also been submitted, to match page numbers to the "Schedule of Revisions." The minor changes to the drawings of the CAA barrier are considered to also be applicable to similar drawings in other CFFF License documents (License Application, FNMC Plan, etc.) that will not be so revised because they do not require the level of detail necessary for the Physical Security Plan.

Westinghouse requests that the enclosures to this letter be withheld from public disclosure in accordance with the provisions of 10CFR2.790(d). If you have any questions, please write to me at the above address; telephone (803) 776-2610, Extension 3393; or Fax (803) 695-3964.

Sincerely,

WESTINGHOUSE ELECTRIC COMPANY

Robert A. Williams  
Safeguards Coordinator
