

JAN 2 3

The Tracker and Lumber Manufacturers  
Company

License No. 14-13711-01

Attn: Mr. A. J. Shaffer, Plans  
Manager

1000 Tower Building  
1000 Tower Bldg. 1000

Enclosure:

Thank you for your letter of December 19, 1977. In answer to our letter of November 1, 1977, issuing Form NRC-391, INSPECTION FINDINGS AND DISCREPANCY STATEMENT, is an enclosure. Your letter also refers to your Company Policy with regard to radiation levels and a maximum limit of 2 mR/hr at the surface of the source holder. Based upon this, your statement of concern with respect to posting the NRC-3, and the fact that such sealed source devices (100 mil americium 241 sealed source housed in a 5 liter 31-1 source holder) are generally licensed by the NRC, we have enclosed a modified Form NRC-391 in notification of a clear inspection. It is not necessary that you sign this copy; retain it for your files. Will you please return the copies of the original Form NRC-391 issued November 10, 1977, in which items 1 and 2 indicated noncompliance.

From our telephone conversation with Mr. Shaffer on January 17, 1978, we understand that you will post a notice in compliance with 10 CFR 19.11(b) and that a copy of the NRC-3 will be included with these documents. Will you please inform us if our understanding of this is not correct. Thank you for your cooperation with us in this matter.

Sincerely,

V. L. Fisher, Acting Chief  
Fuel Facility and Materials  
Safety Branch

Enclosure: Form NRC-391

cc: Mr. Shaffer

Mr. A. J. Shaffer, NRC-3

cc: Mr. Shaffer (12/19/77)
