Nuclear Regulatory Commission
Attention: Peter Bradford
1717 "H" Street N.W.
Washington, D.C. 20555

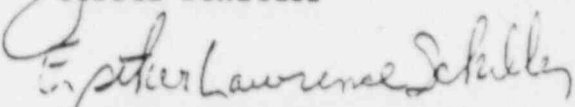

Dear Mr. Bradford:

We consider that the Diablo Canyon Nuclear Power Plant is extremely dangerous. It will damage the ocean by releasing hot water and pollutants into it. There is no safe method of storage for the nuclear wastes it will generate. And if there should be the large earth quake which we have been warned is coming, the entire state of California will be placed in jeopardy.

California now has twenty percent more energy than it needs. If we must have a Diablo Canyon power plant, let it not be nuclear!

Sincerely,

Gerald Schiller
