Docket Nos. 50-277  
50-278

License Nos. DPR-44  
DPR-56

Philadelphia Electric Company  
ATTN: Mr. C. A. McNeill  
Executive Vice President  
Nuclear  
2301 Market Street  
Philadelphia, Pennsylvania 19101

Gentlemen:

Subject: Inspection Nos. 50-277/88-08 and 50-278/88-08

This letter refers to the routine safety inspection conducted by Mr. E. H. Gray and Mr. H. J. Kaplan of this office on March 14-18, 1988 at the Peach Bottom Power Station, Delta, Pennsylvania. Mr. Gray discussed the findings of the inspection with Mr. D. Smith of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection examined the piping replacement program and consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Based on the results of this inspection, it appears that drawing control was not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. Specifically, Unit 2 emergency service water piping was being fabricated to sketches that were not in the drawing control system. This violation has been categorized by severity level in accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (Enforcement Policy). You are required to respond to this letter and in preparing your response, you should follow the instructions in Appendix A.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

Your cooperation with us in this matter is appreciated.

Sincerely,

ORIGINAL SIGNED BY  
WILLIAM V. JOHNSTON

William V. Johnston, Acting Director  
Division of Reactor Safety
