Gentlemen:

Subject: Inspection No. 85-01

This refers to the routine safety inspection conducted by Mrs. Teresa Hall Darden of this office on December 27 and 30, 1985 of activities authorized by NRC License Nos. 08-01709-04, 08-01709-06 and 08-01709-07 and to the discussions of our findings held by Mrs. Darden with Mr. J. Greenbaum and others of your staff at the conclusion of the inspection, and to a subsequent telephone discussion between Mrs. Darden and Mr. Grolten on January 7, 1986.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your licenses. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Our inspector also verified the steps you have taken to correct the violation brought to your attention in the enclosure to our letter dated January 25, 1984. We have no further questions regarding your action at this time.

Within the scope of this inspection, no violations were observed.

From the discussions conducted during the inspection, we understand that you plan to conduct practice drills in your emergency procedures in Radiation Therapy to assure an adequate response should the source stick or the interlock system fail. Your actions on this matter will be reviewed during the next inspection of your licensed activities.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room.
