

Dear Mr. Bradford,
I am a resident of California and concerned about
the Diablo Canyon Nuclear Power Plant. I don't
think it should be licensed because it is
unsafe. It is an anachronism and there
is no safe way to dispose of the
nuclear waste. Please join with us in a
nuclear free future. Also, the Humboldt Bay
Nuclear Power Plant has failed to comply with
an order by the Atomic Safety and Licensing Board
that they bring the Humboldt Nuclear Plant
up to current Nuclear Regulatory Commission
seismic standards. The Humboldt plant should be
decommissioned but the utility has refused
to do this as yet. Please I think the ASLB
should back up its threat to P.S. and $\bar{=}$, revoke
its license!

Sincerely,

Lorna Chalph
