Re: Amendment to condition 12, license # 48-23476-02 for  
Twin Ports Testing, Inc., 1301 North Third Street,  
Superior, Wisconsin 54880

Dear Mr. Sreniawski:

Twin Ports Testing Inc., request an amendment to Section 12  
of the license noted above. to read.....

12. Licensed material shall be used by or under the supervision and in the physical presence of, individuals who have satisfactorily completed the device manufacturer's training program, or equivalent, for gauge users and have been designated by the licensee's radiation protection officer. The licensee shall maintain records of the individuals who have been designated as authorized users.

Twin Ports Testing, Inc., requests this amendment because Twin Ports Testing, Inc., has radiographers trained in compliance with license # 48-23476-01 whom we would like to use under license # 48-23476-02. These radiographers receive extensive radiation safety training under their license and would only need training pertinent to the machines covered under license # 48-23476-02 to be competent operators.

Twin Ports Testing, Inc., would also like to compile the radiation safety training program in use under license # 48-23476-01 and the training program for license # 48-23476-02 to meet the amended condition 12 for future in house training of technicians.

Twin Ports Testing, Inc., request a quick turn around on this amendment due to possible jobs starting the first of the year.

If I can be of any help, please contact myself or Mr. Jerry Russell.

Thank you,

David S. Henderson  
Twin Ports Testing, Inc.
