Attn: Mr. Jose A. Calvo, Director  
Project Directorate IV  
Division of Reactor Projects  
III, IV, V and Special Projects

SUBJECT: Arkansas Nuclear One - Unit 1  
Docket No. 50-313  
License No. DPR-51  
ANO-1 Appendix R Exemption  
Requests Modification Schedule

Dear Mr. Calvo:

In our letter dated August 21, 1985 (0CAN088508), we requested exemption from 10CFR50, Appendix R, for the diesel generator exhaust fans. At that time we committed to various modifications in connection with the request. Mr. George Dick of your staff has requested that we provide a status of these modifications.

The first modification was to reroute the conduit for the north diesel generator room exhaust fans. The conduit was to be routed through the hot-tool room and the boric acid tank room, and a one hour wrap installed on the conduit in the hot-tool room. This modification has been completed.

We also committed to install a three hour door in the wall between the A, B and C,D fans. Also, power cables to the air intake louvers were to be rerouted so that these louvers are powered from vital power sources. These modifications have also been completed.

Very truly yours,

Dan R. Howard  
Manager, Licensing
