Dear Mr. Hairston:

SUBJECT: RESOLUTION OF NRC BULLETIN 87-01, "THINNING OF PIPE WALLS AT NUCLEAR POWER PLANTS, "(MPA B-96) FOR JOSEPH M. FARLEY NUCLEAR PLANT, UNITS 1 AND 2

On July 9, 1987, NRC Bulletin 87-01 was issued to request that licensees submit information concerning their programs for monitoring the thickness of pipe walls in high-energy single-phase and two-phase carbon steel piping systems. You provided a response to the Bulletin in a letter dated September 8, 1987.

The information that you provided is being used to determine the extent of industry participation and implementation of erosion/corrosion inspection programs, and to obtain data on observed pipe wall thinning. The NRC staff does not plan to determine the adequacy or the acceptability of your current program at this time.

No further plant specific action with respect to the bulletin is required at this time.

Sincerely,

Edward A. Reeves, Senior Project Manager  
Project Directorate II-1  
Division of Reactor Projects I/II
