Gentlemen:

This refers to the inspection conducted by Messrs. L. E. Ellershaw and R. G. Taylor of this office during the period April 4-8, 1988, of activities authorized by NRC Operating License NPF-47 for the River Bend Station, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included the annual quality assurance program review including the records programs; tests and experiments program; procurement program; and the receipt, storage, and handling of equipment and materials program. Within these areas, the inspection consisted of selective personnel, and observations by the NRC inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

One unresolved item is identified in paragraph 5 of the enclosed inspection report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
L. J. Callan

L. J. Callan, Director
Division of Reactor Projects
