BROWNS FERRY NUCLEAR PLANT (BFN) - VERIFICATION OF SAFETY ISSUES MANAGEMENT SYSTEM (SIMS) MULTIPLANT ACTION (MPA) ITEMS

This letter is to respond to the NRC request by letter dated June 22, 1987, to verify the data contained in the NRC SIMS tracking system for BFN. Extensive research into TVA current and historical files was conducted to verify this data. This research included investigation into NRC/TVA correspondence, internal correspondence, procedures, design documents, and modification workplans.

Enclosed in this letter are three attachments. Attachment 1 is SIMS data for BFN Unit 1, attachment 2 is SIMS data for BFN Unit 2, and attachment 3 is SIMS data for BFN Unit 3. In these attachments are columns for the NUREG-0777 item number (TMI Item), the MPA item number, the issue description, the imposition date, the implementation date, and a column for remarks. The imposition date is the date that NRC and TVA reached agreement for action on the issue either by a safety evaluation report (SER) or letter of agreement. If neither of these were found an imposition date was not listed. The implementation date is the date of the SER or the NRC letter accepting TVA's actions. If one of these two documents could not be found, the implementation date is listed as the completion date of an engineering change notice (ECN), procedure revision date, or the date of the TVA letter to NRC indicating completion of required actions.

Some items have neither an imposition nor implementation date. If this is the case the item has been incorporated into another item or TVA has been advised by NRC staff that verification is not required for BFN.

In the cases where the item for unit 1, 2, or 3 is to be completed before restart or during a subsequent refuel cycle the word "restart" or "refuel" and the refuel number, will be listed under the implementation date.

According to research by TVA staff and TVA's understanding of the item, the attached dates are the most accurate that TVA could obtain. If you have any questions or need further information please contact J. L. Turner at (205) 729-2853.

Very truly yours,
