Gentlemen:

River Bend Station - Unit 1
Refer to: Region IV
Docket No. 50-458/Report 85-67

In Gulf States Utilities' (GSU) response to Notice of Violation 8567-01 (RBG-23019) dated January 22, 1986, GSU revised the procedure addressing an escort's control of visitors within the Protected Area to enhance the assignment of responsibility for escorting visitors. GSU is revising Plant Security Procedure (PSP)-4-300 to outline details for controlling the exchange process of visitor escort requirements whereby escort responsibility for assigned visitors may be changed within the protected area (PA). The procedure revision now requires the existing escort to identify himself/herself, the visitor(s), and the new escort to the Supervisor Access Control Station (SACS). The new escort informs the SACS that he/she assumes responsibility for the visitor(s) and acknowledges an understanding of those responsibilities and that he possesses the original security forms. The new escort is instructed by the SACS to assure his/her name is now on the security form at the time escort responsibilities change. Since the revised procedure requires the security forms to always identify the escort, security is knowledgeable of who has escort responsibility for any given visitor. This revision continues to address the concern of Notice of Violation 8567-01 and has been determined to not reduce the effectiveness of the Security Plan pursuant 10CFR50.54p.

Sincerely,

J. E. Booker
Manager-River Bend Oversight
River Bend Nuclear Group
