Attention: Mr. D. F. Kirsch, Acting Director
Division of Reactor Safety and Projects
Palo Verde Nuclear Generating Station (PVNGS)
Units 2, 3
Docket Nos. 50/529, 530

Subject: Time Extension for Report - DER 85-42
A 50.55(e) Potentially Reportable Deficiency Relating to
Diesel Generator Fuel Rack Linkage
File: 86-006-216; D.4.33.2

Reference: (A) Telephone conversation between R. C. Sorenson and
T. P. Siegfried on December 9, 1985

(B) ANPP-34488, Dated January 8, 1986 (Interim Report)

Dear Sir:

The NRC was notified of a potentially reportable deficiency in Reference (A), and an Interim Report was transmitted by reference (B). At that time it was estimated that a Final Report would be available by February 14, 1986.

Bechtel is now finalizing the design for a new governor fuel linkage lever which will be manufactured at the jobsite to replace the existing levers. It is now expected that this information will be finalized by March 14, 1986, at which time a complete report will be submitted.

There is no new information or change to the Interim Report at this time.

Very truly yours,
E. E. Van Brunt

E. E. Van Brunt, Jr.
Executive Vice President
