Gentlemen:

In the Matter of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328

SEQUOYAH NUCLEAR PLANT (SQN) UNITS 1 AND 2 - NRC INSPECTION REPORT
NOS. 50-327, -328/87-73 - REVISED COMMITMENT

In TVA's August 17, 1988 submittal to NRC concerning the need for an additional assistant shift operations supervisor, TVA committed to revise Emergency Instructions ES-0.2, "SI Termination," and E-1, "Loss of Reactor or Secondary Coolant." Upon further evaluation, it has been determined that a revision to ES-0.2 is not required to ensure performance of the compensatory measure (CM) to start the main control room heating, ventilating, and air conditioning. The revision to E-1, coupled with the existing procedural steps in ES-0.2, will ensure the CM is performed in a timely manner and will not affect the performance of safety-related equipment. Therefore, TVA will not revise ES-0.2 as committed to in the August 17, 1988 submittal. That commitment is hereby deleted.

If you have any questions concerning this submittal, please telephone M. A. Cooper at (615) 870-6549.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
