Reference: Docket No. 50-285

Gentlemen:

SUBJECT: Additional Change Page for Application for Amendment Dated
April 15, 1988

The attached page was not included in the Application for Amendment to remove the organizational charts from the Technical Specifications, dated April 15, 1988. As noted in that application, organizational changes are being undertaken concurrently. To support that effort, the position of Supervisor - Chemical and Radiation Protection has been divided into two positions, those being Supervisor - Radiation Protection and Plant Chemist. The wording of Specification 5.3.1 has been revised to account for this change. OPPD would appreciate this portion of the change being in the Federal Register Notice at the same time as our application of April 15, 1988 to allow issuance as part of the same amendment. The No Significant Hazards Considerations discussion remains unchanged from that previously submitted.

If you have any questions, please do not hesitate to contact us.

Sincerely,

R. L. Andrews
Division Manager
Nuclear Production
