JOSEPH W. GALLAGHER  
VICE PRESIDENT  
NUCLEAR SERVICES

September 1, 1988

Docket Nos. 50-277  
50-278

Mr. Steven A. Varga, Director  
Division of Reactor Projects  
Office of NRR  
U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

Subject: Peach Bottom Atomic Power Station  
Generic Letter 83-28, Items 3.1.2 and 3.2.2

Reference: June 10, 1988 letter from J. W. Gallagher, PECO,  
to S. A. Varga, NRC

Dear Mr. Varga:

This letter provides the status of Philadelphia Electric Company's activities related to Items 3.1.2 and 3.2.2 of Generic Letter 83-28. The referenced letter stated that the one-time vendor manual update program had been completed, and that by August 31, 1988 we would provide a schedule for incorporating the appropriate vendor guidance from the program into the station procedures and Technical Specifications. This letter provides that schedule. We apologize for the delay of this submittal.

Currently, 46 procedures are being considered for revision based on the completed review of vendor manual updates against plant procedures. It is anticipated that the appropriate procedure revisions will be completed by November 30, 1988.

The new Diesel Generators manual was issued in August 1988. A preliminary review of a draft copy of the new manual against the Diesel Generator procedures was conducted and the procedures were found to be adequate. A comprehensive review of the final issued manual against the Diesel Generator procedures will be performed and it is anticipated that any required procedure revisions will be completed by January 15, 1989.

Because all safety-related Technical Specification test and maintenance requirements are implemented by a procedure, the procedure

review in progress also constitutes the check of Technical Specifications required by the Generic Letter. To date, no discrepancies between vendor manual updates and the Technical Specifications necessitating Technical Specification revisions have been identified.

In a related matter, we wish to advise you that the list of vendor manuals transmitted with the referenced letter included three General Electric manuals on page six that are not safety-related and, thus, were not within the scope of the one-time vendor manual update program. The manual numbers are M-2-363-12, M-2-371-2 and M-2-372. We regret this error and any inconvenience it may have caused you.

If you have any questions or require additional information, please do not hesitate to contact us.

Very truly yours,

Attachment
