U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Reference: Beaver Valley Power Station, Unit No. 2
Docket No. 50-412, License No. NPF-73
Proposed Operating License Change Request No. 15

Gentlemen:

Enclosed are:

1. Application for Amendment to the above Operating License to add Section 3.9.14 and associated bases and revise Design Feature Sections 5.3.1 and 5.6.1. These changes establish revised fuel assembly U-235 enrichment limits on fuel storage in the new and spent fuel racks.

These changes have been reviewed by the OSC and ORC and determined to be safe and to not involve an unreviewed safety question.

2. Documents designated Attachments A, B, C, D and E set forth the changes in the Technical Specifications, safety analysis, and no significant hazards evaluation. The FSAR changes and criticality analyses are provided for background information only. The FSAR will be updated to reflect the enclosed revision.

A check in the amount of \$150.00 is attached as payment of the license amendment application fee in accordance with 10CFR170.

Very truly yours,

J. D. Sieber
