Washington, D. C. 20555

Subject: Catawba nuclear station, Units 1 and 2
Docket Nos. 50-413 and 50-414
Technical Specification Amendment
Monitor Tank Building Control Room Annunciators

Dear Sir:

This letter contains a proposed amendment to the Technical Specifications for Facility Operating License Nos. NPF-35 and NPF-52 for Catawba Units 1 and 2. The request involves adding clarification as to the location of the alarm annunciators for the radiation monitors in the Monitor Tank Building. This amendment will also correct a reference to EMF-58 which should read EMF-57.

The attachment contains the proposed change and a discussion of the justification and a No Significant Hazards analysis. The analysis is included pursuant to 10 CFR 50.91 and it has been concluded that the proposed amendment does not involve significant hazards considerations.

This proposal involves one amendment request to Catawba's Technical Specifications. Accordingly, pursuant to 10 CFR 170.21 a check for \$150.00 is enclosed.

Pursuant to 10 CFR 50.91 (b) (1) the appropriate South Carolina State Official is being provided a copy of this amendment request.

Very truly yours

Hal B. Tucker
