

D.C. Sunday, January 15, 1984

Dear Mr. Galusky

R.G.

Warm greetings from San Luis

Obispo. I have come from
Mendocino County to participate
in the Peoples Emergency Response

Plan. Part of my contribution
has been to facilitate a Sabbath
Ceremony and Vigil ^(candlelight vigil) - to help
bring to this action a spirit
of wholeness, love, gentleness,
reverence for all of God's creation.

We had a wonderful Shaming at
the "front gates" on San Luis Day.

I have written a long
letter to Mr. Palladino - It is

also for you - as this one
must be brief.

Please do not grant
a low power test license to
Diablo Nuclear Power Plant.

Diablo is unsafe, built poorly,
(inspectors lose their jobs if they
don't approve the work - numerous
local people here have told me
this from their direct conversations
with workers). A low power license
could set in motion a whole cycle
that would contaminate our planet
for centuries & could damage our
future generations.

3.
Please unconditionally deny
a license to Diablo. If you
do so you will be thanked
and applauded by millions
of people - for your wisdom
and courage.

Please do read my letter
to Mr Palladio. It is also to
you.

Thank you

Sincerely,

Mrs Eleanor Swallen
mother of 2 young children
