South Texas Project Electric Generating Station
Units 1 and 2
Docket Nos. STN 50-498 and STN 50-499
Supplement to Response to NRC Concerns
Regarding Emergency Operating Procedures

On August 22, 1988, Houston Lighting and Power Company (HL&P) submitted a plan to address NRC concerns regarding Emergency Operating Procedures (EOP's) at South Texas Units 1 and 2 (ST-HL-AE-2770). One part of that plan is a technical review of the Unit 1 and Unit 2 EOP's by the design engineering organization (the Support and/or Nuclear Engineering Organizations). This supplement defines the scope and responsibilities for this review and provides a timetable for completion.

The technical review will be performed by Westinghouse with participation by the site Support Engineering and Nuclear Engineering Departments. The review will consist of three related tasks:

1. A review of the Unit 2 EOP's will be performed to identify technical concerns and needed enhancements.
2. A Design Difference and Analysis Applicability Document will be developed to identify differences between South Texas and the Westinghouse Low Pressure Reference Plant with respect to emergency operations.
3. A detailed step by step comparison of South Texas Unit 2 EOP's with the Owners Group EOP guidelines will be performed. Step deviations, omissions and additions will be justified and documented.

Task 1 will be completed by September 30, 1988. Any concerns or enhancements identified will be prioritized and addressed in a timely manner. The remaining tasks will be completed by January 31, 1989. Any discrepancies identified in the Unit 2 EOP review will be promptly resolved for Unit 1.

If you should have any questions on this matter, please contact Mr. S.M. Head at (512) 972-8392.
