Attention: Mr. Vincent S. Noonan, Project Director  
PWR Project Directorate No. 5

References: (a) Construction Permits CPPR-135 and CPPR-136, Docket  
Nos. 50-443 and 50-444  
(b) WCAP-10413, "Steam Generator Tube Plugging Margin Analysis  
for the Seabrook Nos. 1 and 2 Nuclear Power Plants"

Subject: Steam Generator Tube Plugging Analysis

Dear Sir:

In response to Request for Additional Information (RAI) 210.69, it was committed that Westinghouse will provide a report prior to commercial operation describing the tube plugging criteria which will be employed for Model F steam generators. Additionally, Westinghouse will review the current position in the Seabrook FSAR on Regulatory Guide 1.121, "Bases for Plugging Degraded PWR Steam Generator Tubes," to confirm its applicability to the Seabrook plant.

Westinghouse has performed the subject analysis (Reference (b)) in accordance with the recommendations of Regulatory Guide 1.121. Furthermore, it has been confirmed that the current discussion in FSAR Section 1.8 on Regulatory Guide 1.121 is correct and applicable to Seabrook Station.

Should you or your staff have any questions, please do not hesitate to contact us.

Very truly yours,

J. DeVincentis, Director  
Engineering and Licensing
