Subject: Crystal River Unit 3
Docket No. 50-302
Operating License No. DPR-72
Request for Interpretation

Dear Sir:

Title 10 of the Code of Federal Regulations in Part 50.30(b) indicates that each application for a license and each amendment of each application must be executed in a signed original by the applicant or duly authorized officer under oath of affirmation. In Part 50.71(e)(2), regulations require that updated FSAR be certified by a duly authorized officer of the licensee. These requirements are currently being interpreted literally. As a result some items have been processed in a less efficient manner. FPC does not believe that this requirement was intended to hinder the processing of correspondence. Rather, it was intended to assure that correspondence submitted for FPC represented the company. Therefore, the following interpretation of the requirement is proposed. Applications for a license or amendments to a license will be executed in a signed original by a duly authorized officer or his designee(s). Certification of the updated FSAR will be provided by a duly authorized officer or his designee(s). These assure that submitted correspondence from FPC represents the company.

FPC requests concurrence be provided concerning this interpretation in accordance with 10 CFR 50.3 "Interpretations". This proposed interpretation of the requirement in 10 CFR 50.30(b) meets the intent of the requirement and will allow FPC to more efficiently process correspondence.
