

April 22, 1988

Docket No. 50-368

Mr. T. Gene Campbell
Vice President, Nuclear
Operations
Arkansas Power and Light Company
P. O. Box 551
Little Rock, Arkansas 72203

Dear Mr. Campbell:

SUBJECT: PERFORMANCE TESTING OF RELIEF AND SAFETY VALVES, NUREG-0737,
ITEM II.D.1, ARKANSAS NUCLEAR ONE, UNIT 2 (TAC NO. 44561)

On June 5, 1987 you submitted a response (2CAN068702) to our request for additional information, dated February 2, 1987. It has come to our attention that deficiencies were subsequently identified which would alter the seismic pipe stress analysis results supplied in your previous submittals. This issue was discussed with Mr. Dave Baxter and other members of your engineering staff on April 15, 1988. We request that you provide information regarding the deficiencies identified and the corresponding revised seismic pipe stress analysis results.

In order for us to maintain our review schedule, your response is requested within 30 days of receipt of this letter.

We are concerned that you had not revised your submittals, regarding safety and relief valve performance testing, upon finding deficiencies which impacted the accuracy of the information provided. We would appreciate being advised of any other outstanding issues where you identified errors in your submittal(s) after issuance, but have yet to inform us.

The reporting and/or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P. L. 96-511.

Please contact us if you have any questions concerning this request.

Sincerely,

/s/

Jose A. Calvo, Director
Project Directorate - IV
Division of Reactor Projects - III,
IV, V and Special Projects
