

UNITED STATES NUCLEAR REGULATORY COMMISSIONCOMMONWEALTH EDISON COMPANYDOCKET NOS. 50-373 AND 50-374NOTICE OF ISSUANCE OF AMENDMENT TOFACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 59 to Facility Operating License No. NPF-11 and Amendment No. 39 to Facility Operating License No. NPF-18, issued to Commonwealth Edison Company, (the licensee), which revised the Technical Specifications for operation of The LaSalle County Station, (the facility), Units 1 and 2, located in LaSalle County, Illinois. The amendments are effective 30 days after the date of issuance.

The amendments correct an inconsistency between Technical Specification requirements regarding the suppression pool high level alarm. The following changes to the Technical Specification have been made:

1. The suppression pool high water level alarm setpoint in Technical Specification 4.6.2.1.c.1 has been raised 1 inch to be consistent with Technical Specification Table 3.3.3-2 and the UFSAR.
2. All references to suppression pool level in the Technical Specifications have been amended to be consistent with plant indications.
3. A figure has been added to the Technical Specification bases which correlates plant elevation, suppression chamber levels and suppression pool level indications.

These revisions to the licenses of LaSalle County Station, Units 1 and 2 are in response to the licensee's application for amendment dated April 29, 1987.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the FEDERAL REGISTER on December 8, 1987 (52 FR 46541). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment and Finding of No Significant Impact related to the action and has concluded that an environmental impact statement is not warranted because the action will not have a significant adverse effect on the quality of the human environment and there will be no environmental impact attributable to the action beyond that which has been predicted and described in the Commission's Final Environmental Statement for the facility dated November 1978.

For further details with respect to the actions see (1) the application for amendment April 29, 1987, and Amendment No. 39 to License No. NPF-18, (2) Amendment No. 59 to License No. NPF-11 and (3) the Commission's related Safety Evaluation and Environmental Assessment and Finding of No Significant Impact.

All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., and at the Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348. A copy of items (2), and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Projects.

Dated at Rockville, Maryland this 31st day of August 1988.

FOR THE NUCLEAR REGULATORY COMMISSION

A handwritten signature in cursive script that reads "Daniel R. Muller". The signature is written in dark ink and is positioned above the typed name and title.
