U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Ms. E.G. Adensam, Chief
Licensing Branch No. 4

Subject: McGuire Nuclear Station
Docket Nos. 50-369 and 50-370
Technical Specification Changes for McGuire Nuclear Station
Spent Fuel Storage Pool Region 2

Dear Mr. Denton:

Attached are proposed license amendments to Facility Operating License NPF-9 and NPF-17 for McGuire Nuclear Station - Units 1 and 2 respectively. The proposed changes to the Technical Specifications seek to :

1. Add the capability to perform a safety analysis on individual fuel assemblies as an acceptance criteria for fuel storage in Region 2 of the Spent Fuel Storage Pool if at first they do not appear to qualify; and
2. Replace Technical Specification Figure 3.9-2 with proposed Table 3.9-1, Minimum Burnup versus Initial Enrichment for Region 2 Storage, as an acceptance criteria for fuel assembly storage in Region 2; and
3. Provide basis to Technical Specification 3/4.9.12.

Attachment I contains the proposed Technical Specification changes. Attachment II provides a technical Justification and Safety Analysis in support of the proposed changes. Attachment III provides an analysis conforming to the standards contained in 10CFR50.92 as required by 10CFR50.91. This analysis concluded that the proposed amendments would not involve any significant hazards considerations.
