Gentlemen:

ULNRC-1824

DOCKET NO. 50-483  
CALLAWAY PLANT  
RESPONSE TO NRC REQUEST FOR UNFETTERED ACCESS

Reference: NRC Letter to Union Electric dated July 27, 1988

In response to the NRC letter dated July 27, 1988 concerning Unfettered Access, Union Electric Company will accept the following documented training until the NRC-wide training program is established:

1. NRC Headquarters Office Training
2. NRC Regional Office Training
3. Training at a Licensee Power Plant

The training certification forwarded from the Region III Office will be adequate documentation.

On May 23, 1988 the Hazardous Communications Act, 29CFR1910.1200, went into effect. To insure compliance with this law, Union Electric has required all currently badged Callaway Plant personnel to receive this training; and have included the information in the initial Orientation Course for all employees prior to initial badging. This material has been included in the Abbreviated Site Access Training Program (Unfettered Access Program), thereby extending the training and badging process from one to two hours.

If the NRC is already providing this training; or takes exception to the addition for any other reason, please let us know and we will remove the Hazardous Communications material, and reduce the course and badging process to one hour.

If you have any questions concerning this information, please contact me.
