September 30, 1998

Dear Sir/Madam,

Please attach the following information to the amendments to our petition to intervene in the proceedings regarding the application of Duke Energy Corporation to renew the operating license for Units 1, 2 and 3 of the Oconee Nuclear Station (Docket Nos. 50-269, 50-270 and 50-287).

The Chattooga River Watershed Coalition (CRWC), in addition to being a non-profit organization, is a membership organization with numerous members who reside within 50 miles of the Oconee Nuclear Station. The National Wild and Scenic Chattooga River is located approximately 20 miles from the Oconee Nuclear Station. The organization and its membership are dedicated to the protection and preservation of the Chattooga River watershed, and contiguous areas. The Oconee Nuclear Station is located in such an area, and thus the re-licensing proceedings here fall within the scope of our mission statement.

We appreciate your attention to this information.

Sincerely,

Norman "Buzz" Williams (CRWC member)  
William "Butch" Clay (CRWC member)  
W. S. Lesan (CRWC member)
