

ENCLOSURE

NOTICE OF VIOLATION

Carolina Power and Light Company
Brunswick 1 and 2

Docket Nos. 50-325 and 50-324
License Nos. DPR-71 and DPR-62

During the Nuclear Regulatory Commission (NRC) inspection conducted on July 7 - August 7, 1988, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1987), the violation is listed below:

10 CFR 50 Appendix B, Criterion V, requires that activities affecting quality shall be prescribed by documented instructions or procedures of a type appropriate to the circumstances.

Contrary to the above, instructions of a type appropriate to the circumstances were not used in that, on and before July 22, 1988, wood support structures were installed under the four diesel generator silencers using a plant services authorization. Consequently, no shift foreman review was obtained prior to the installation, and a fire on the diesel generator building roof resulted.

This is a Severity Level IV violation (Supplement I).

Pursuant to the provisions of 10 CFR 2.201, Carolina Power and Light Company is hereby required to submit a written statement or explanation to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, Region II, and a copy to the NRC Resident Inspector, within 30 days of the date of the letter transmitting this Notice. This reply should be clearly marked as a "Reply to a Notice of Violation" and should include [for each violation]: (1) admission or denial of the violation, (2) the reason for the violation if admitted, (3) the corrective steps which have been taken and the results achieved, (4) the corrective steps which will be taken to avoid further violations, and (5) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending the response time.

FOR THE NUCLEAR REGULATORY COMMISSION
