Reference: Letter dated April 8, 1988 from L. J. Callan, NRC  
to B. D. Withers, WCNOG  
Subject: Docket No. 50-482: Inspection Report 50-482/87024  
Equipment Qualification Inspection

Gentlemen:

The purpose of this letter is to establish the revised submittal date for the response to violations in Inspection Report 50-482/87024 concerning the Equipment Qualification Inspection conducted at Wolf Creek Generating Station. Based on discussions between Mr. L. J. Callan, Director, Division of Reactor Projects and Mr. O. L. Maynard on May 6, 1988, Wolf Creek Nuclear Operating Corporation (WCNOG) will respond to the notice of violations on or before May 23, 1988.

The Reference transmitted the Equipment Qualification Inspection Report and required a response to the violations identified in the Inspection Report. Due to the resources required to address an NRC identified equipment qualification concern on Bunker Ramo Electrical Penetrations, additional time is required to address the violations.

Very truly yours,

B. D. Withers  
President and  
Chief Executive Officer
