

FEB 25 1986

Docket Nos. 50-443
50-444

Public Service of New Hampshire
ATTN: Mr. Robert J. Harrison
President and Chief Executive Officer
P. O. Box 330
Manchester, New Hampshire 03105

Gentlemen:

The Nuclear Regulatory Commission has completed a review of your revised exercise scenario, Revision 3 dated February 25, 1986. The scenario revisions have been reviewed by the Region I team responsible for evaluation of the onsite portion of the February 26, 1986 exercise. It is our finding that the exercise scenario has been sufficiently revised to prevent compromise of the onsite portion of the exercise by your inadvertent release of Revision 0, dated January 2, 1986, of the exercise scenario. The revised scenario satisfies the objectives which we have previously agreed to for the onsite portion of the exercise.

We therefore find that the onsite portion of the February 26, 1986 exercise, using the revised scenario will be a graded exercise. Your cooperation with us in this matter is appreciated. Should you have any additional questions regarding the exercise, please contact me at (215) 337-5208.

Sincerely,

Original Signed By:

Terry L. Harpster, Chief
Emergency Preparedness Section
Division of Radiation Safety
and Safeguards
