Dear Sir:

The Nuclear Regulatory Commission (NRC) Region III has received allegations concerning the availability of quality assurance procedures to contractor employees at the Braidwood Station. The specific allegations are listed in the attached enclosure.

Region III requests that you address each of the attached allegations. Your review should determine whether the individuals involved did any safety-related work, whether they were given sufficient access to procedures which they were expected to use, and whether there was sufficient procedural control of their activities. The results of your review should be provided to Region III by May 27, 1988.

If you have any questions, please call G. Van Sickle at (312) 790-5299.
