Docket No. 50-508

Washington Public Power Supply System
Attention: Mr. D. W. Mazur
Managing Director
P. O. Box 968
3000 George Washington Way
Richland, Washington 99352

Gentlemen:

SUBJECT: READINESS REVIEW PROGRAM - CONSTRUCTION ASSURANCE ACTIVITIES - WNP-3

- REFERENCE: 1) Letter G03-85-563, G. C. Sorensen (WPPSS) to J. B. Martin (RV), "Readiness Review Program", dated September 25, 1985.
- 2) Region V Letter, D. F. Kirsch (RV) to A. D. Kohler (WPPSS), "WNP-3 Construction Assurance Program", dated November 20, 1985.
- 3) Letter G03-86-026, G. C. Sorensen (WPPSS) to J. B. Martin (RV), "Readiness Review Program Construction Assurance Activities", dated January 9, 1986.
- 4) Letter G03-86-045, G. C. Sorensen (WPPSS) to J. B. Martin (RV), "Readiness Review Program", dated January 20, 1986.

Reference (1) submitted Phase I of your Construction Assurance Program (CAP) Plan for our review and approval. This CAP is intended to provide a self assessment of the completed construction and construction process used for constructing the completed portion of the WNP-3 plant to ensure that Final Safety Analysis Report (FSAR) commitments and NRC regulations have been met. NRC staff comments were transmitted to you by reference (2); reference (3) provided your response to reference (2), and reference (4) incorporated reference (3) commitments, as applicable, in revision 1 of your Engineering Assurance Program description and Construction Assurance Program description.

Based on the NRC staff review of the CAP plan, it appears that the program can provide a satisfactory assessment of the completed construction and construction process at WNP-3. However, your module report format and content description were identified by the Supply System to be tentative. This will be subject to further NRC inspection and review. Notwithstanding the tentative module report format and content, I have determined that your commitment to conduct a CAP as a part of your Readiness Review Program and the CAP plan itself are acceptable. Details of the NRC staff evaluation of your proposed plans are contained in the enclosed inspection report.

Region V, which has lead NRC responsibility for inspection of these activities, will be inspecting and reviewing your implementation of the construction assurance program and your program module reports to determine if your construction reviews provide confirmation that your completed plant construction complies with your FSAR commitments and NRC regulations.

Sincerely,

John B. Martin
Regional Administrator
