

March 27, 1984

NOTE TO: Bruce Wilson

FROM: Al Gibson

SUBJECT: REVOCATION OR SUSPENSION OF [REDACTED] LICENSE

The attached letter is all that we are going to get from MP&L regarding Mr. [REDACTED] failure to pass the Grand Gulf OTEC Board review.

We previously discussed revoking or suspending his license based on the fact that MP&L no longer considers him to be qualified. I continue to believe that such action by the NRC would be appropriate.

Please work with J. Puckett to develop and issue an order for revocation or suspension. Complete by April 13.

NUCLEAR PRODUCTION DEPARTMENT

U.S. Nuclear Regulatory Commission  
Region II  
101 Marietta St., N.W., Suite 2900  
Atlanta, Georgia 30303

Attention: Mr. J. P. O'Reilly, Regional Administrator

Dear Mr. O'Reilly:

SUBJECT: Grand Gulf Nuclear Station  
Unit 1  
Docket No. 50-416  
License No. NPF-13/A  
File: 0260/L-860.0  
Confirmation of Action Letter  
AECM-84/0145

Your Confirmation of Action letter to Mississippi Power & Light Company (MP&L), dated February 29, 1984, documented actions related to the Operator Recertification Program which had been or would be taken by MP&L. These actions included removing the six operators referenced in your letter from licensed duties, and providing a schedule for the completion of corrective actions for these six individuals. The purpose of this letter is to document the actions taken by MP&L in this matter and to provide the response required by your letter of February 29, 1984.

The subject six operators were removed from licensed duties effective February 29, 1984 and will not be returned to such duties until they satisfactorily complete an NRC administered requalification examination. The three operators that failed the simulator portion of the NRC requalification examination (OP-5854, OP-6121, and SOP-4216) have completed a retraining program and were re-examined by Region II personnel on March 12, 1984.

Two of the three operators that were not administered requalification examinations (SOP-4506 and SOP-4217) are scheduled to complete the program in time to be examined by Region II personnel on May 28, 1984. The remaining operator (OP-6241) did not successfully complete the program and will not be recommended for NRC re-examination at this time.
