Subject: Peach Bottom Atomic Power Station, Units 2 and 3
Revision to the Technical Specification Pages for License Change
Application ECR 96-02071

Reference: Letter from Director - Licensing (PECO Energy Company (PECO
Energy)) to U. S. Nuclear Regulatory Commission (USNRC) dated
February 4, 1998

Dear Sir/Madam:

In the Referenced letter, PECO Energy Company (PECO Energy) submitted License Change Application (LCA) ECR 96-02071, in accordance with 10 CFR 50.90, requesting a change to the Peach Bottom Atomic Power Station (PBAPS), Units 2 and 3 Facility Operating Licenses. This proposed change revises Technical Specifications (TS) Surveillance Requirement 3.6.4.1.2 concerning Secondary Containment doors.

Based on several discussions between PECO Energy and U. S. Nuclear Regulatory Commission (USNRC) staff, the TS wording contained in the Referenced submittal is being revised for PBAPS, Units 2 and 3. This wording will maintain the requirement that the secondary containment is not breached at any time when secondary containment is required. This is achieved by maintaining the inner or outer portion of the barrier closed. All secondary containment access doors are normally kept closed except when the access opening is being used for entry and exit of personnel or materials, or when maintenance is being performed on an access opening.

We have determined that this proposed revision does not alter the Information Supporting a Finding of No Significant Hazards Consideration or the Information Supporting an Environmental Impact Assessment of the Referenced LCA.

If you have any questions, please do not hesitate to contact us.

Very truly yours,

Director - Licensing
