Docket No: 50-193

Rhode Island Atomic Energy Commission  
ATTN: Mr. A. Francis DiMeglio, Director  
Nuclear Science Center  
South Ferry Road  
Narragansett, Rhode Island 02882

Gentlemen:

Subject: Inspection Report No. 50-193/88-01

This forwards the report of the routine inspection conducted by Mr. E. Conner of this office on March 28-31, 1988 at Narragansett, Rhode Island, of activities authorized by NRC License No. R-95 and to Mr. Conner's discussions of our findings with you at the conclusion of the inspection.

Our inspector noted numerous out-of-date Technical Specification provisions and the steps taken to incorporate the Technical Specifications into your word processing system. We encourage you to carry that effort through to improving Technical Specification clarity and accuracy by initiating changes to fully reflect current conditions.

During this inspection, an apparent violation involving fuel burnout limit records was identified. This matter should be addressed as specified in Appendix A.

Your cooperation with us is appreciated.

Sincerely,

**Original Signed By**  
**Lee H. Bettenhausen**
