Docket 50-293

Reference (A) Boston Edison Company Letter (W. D. Harrington)
to NRC (D. B. Vassallo), dated 4/17/85 (2.85.079)

Dear Sir:

In Reference (A) Boston Edison Company submitted a proposed Technical Specification amendment which removed the Inservice Inspection weld table, mechanical snubber table, and hydraulic snubber table. By this letter we are submitting revised page 150 to our Reference (A) proposal. NRC is requested to replace page 150 accordingly.

The revised page reflects the results of NRC Safety Evaluation Report (SER) dated August 13, 1985. This SER evaluated the Pilgrim Station Second Ten Year Inservice Inspection Program. The SER was issued subsequent to, and also affected our Reference (A) submittal.

Should you have any questions, please contact me.

Very truly yours,

W D Harrington
