**Subject: Beaver Valley Power Station, Unit No. 1 and Unit No. 2**  
**Docket No. 50-334, License No. DPR-66**  
**Docket No. 50-412, License No. NPF-73**  
**Technical Specification Compliance Issues Special Report**

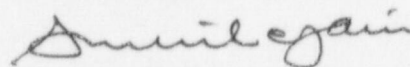

On May 20, 1998, Duquesne Light Company (DLC) committed to provide the attached voluntary special report providing an overview of the Technical Specification compliance issues and the corrective actions taken.

This special report is based on DLC reviews of numerous Beaver Valley Power Station documents (Licensee Event Reports, Condition Reports, etc.), as well as personnel interviews and surveys. Technical Specification compliance issues were found in four main areas. These four areas are related to: (1) general knowledge of Technical Specifications, (2) the site culture/standards regarding compliance with Technical Specifications, (3) program/processes, and (4) procedures. Remedial actions and actions to prevent recurrence have been developed and implemented. These actions are expected to effectively address the Technical Specification compliance issues.

This special report is a broad summary description of action taken and is not intended to identify new commitments.

If you have any questions, please contact S. Hobbs at (412) 393-5203.

Sincerely,

S. C. Jain
