Dear Mr. Sieber:

SUBJECT: CERTIFICATION - BEAVER VALLEY, UNIT 2, RADIOACTIVE LIQUID WASTE  
EQUIPMENT AND PIPING (TAC 68861)

In your letter dated July 6, 1988, you requested that we certify the radioactive liquid waste equipment and associated piping as a water pollution control system necessary to comply with respective Beaver Valley Power Station liquid waste Federal and State discharge permits.

We have reviewed your request and note that the subject equipment has been evaluated in the Safety Evaluation Report (NUREG 1057). We are satisfied that a certificate can be issued (enclosed) to the effect that the subject equipment and associated piping are installed for abating or controlling radioactive water pollutants.

Copies of your request and this response will be available for inspection at the Local Public Document Room (B.F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001) and at the Commission's Public Document Room at 1717 H Street N.W., Washington, D.C. 20555.

Sincerely,

*Original signed by*

Peter S. Tam, Project Manager  
Project Directorate I-4  
Division of Reactor Projects I/II

CERTIFICATE  
DUQUENSE LIGHT COMPANY, ET.AL.  
BEAVER VALLEY POWER STATION UNIT NO. 2  
DOCKET NO. 50-412  
RADIOACTIVE POLLUTION CONTROL FACILITIES

The Nuclear Regulatory Commission hereby certifies as follows:

- a) that it has examined the licensee's submittal dated July 6, 1988, which describes the radioactive liquid waste equipment and piping which have been constructed at the Beaver Valley Power Station, Unit 2; and
- b) that such equipment and piping, as designed, are in furtherance of the purpose of abating and controlling radioactive water pollutants or contaminants resulting from the generation of electricity at the Beaver Valley Power Station, Unit 2.

For the Nuclear Regulatory Commission

John F. Stolz, Director  
Project Directorate I-4  
Division on Reactor Projects I/II

DATED: August 30, 1988
