

UNITED STATES
NUCLEAR REGULATORY COMMISSION
ADVISORY COMMITTEE ON REACTOR SAFEGUARDS
WASHINGTON, D. C. 20555

August 27, 1987

MEMORANDUM FOR: D. Moeller, Chairman
ACRS Subcommittee on Occupational and
Environmental Protection Systems

FROM: *CE*
E. Igne, Senior Staff Engineer

SUBJECT: OFFSITE EMERGENCY PLANNING AT PILGRIM

Attached is a package I requested from the Pilgrim Project Manager on FEMA's self-initiated review and interim finding on the offsite emergency planning at Pilgrim. The bottom line is that, "FEMA has concluded that Massachusetts offsite radiological emergency planning and preparedness are inadequate to protect the public health and safety in the event of an accident at the Pilgrim Nuclear Power Station. Because of the changed circumstances discussed in the report, the finding of adequacy contained in FEMA's previous interim finding no longer applies and that interim finding is hereby superseded."

Pilgrim is in the refueling mode of operation and plans to startup in early November 1987.

As per your suggestion, I will pursue this matter further with Dr. R. Bellamy of Region I. I will keep you abreast on this matter.
