G. S. Spencer, Senior Reactor Inspector
Region V, Division of Compliance

PACIFIC GAS AND ELECTRIC COMPANY - DIABLO CANYON UNIT NO. 1
DOCKET NO. 50-275

The attached report contains the details of a recent visit to PG&E's General Office in San Francisco, California on July 6, 1970. The purpose of the visit was to determine PG&E's plans for and status of the establishment of the Operating, Startup and Safety Committee organizations along with training activities both completed and proposed.

The content of the report shows the importance the licensee has attached to the timely establishment of the operating and startup organization to provide sufficient time for adequate training and involvement of personnel with the activities associated with the construction and future operation of the Unit.

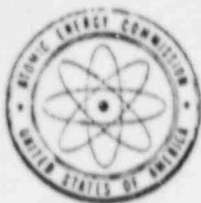

In view of the nature of the visit and personnel contacted, a formal management interview was not held at the conclusion of the visit. I did, however, inform the group that it appeared that PG&E was adequately fulfilling the commitments made in the PSAR concerning the establishment of the operations organization and training of the assigned personnel.

A handwritten signature in cursive script, appearing to read "A. D. Johnson", is positioned above the typed name.

A. D. Johnson
