

October 10, 1969

J. P. O'Reilly, Chief  
Reactor Inspection and Enforcement Branch  
Division of Compliance, Headquarters

PACIFIC GAS AND ELECTRIC COMPANY (DIABLO CANYON UNIT NO. 1)  
DOCKET NO. 50-275

The attached report by our field inspector of a visit to PG&E's main offices on September 16, 1969 is forwarded for information. No items of nonconformance or of safety significance were noted during the visit.

The purpose of the visit was to review QC procedures concerning construction of the containment building and other Class I civil structures. It is our opinion that the procedures developed for this project, if properly implemented, should provide us with the reasonable assurance necessary to conclude that the containment building will be constructed in conformance with the requirements contained in the PSAR.
