Dear Mr. Mrocza:

SUBJECT: MILLSTONE UNIT 2 TMI ACTION ITEM II.D.1 (RELIEF VALVE
AND SAFETY VALVE TESTING) - TAC NO. 44594

By letter dated March 1, 1988, the NRC staff issued its Safety Evaluation (SE) concerning TMI Action Item II.D.1 (Relief Valve and Safety Valve Testing) for Millstone Unit 2. Section 4.1 of the SE documented your commitment to provide test results concerning the adequacy of torque settings for PORV Block Valve motor operators. Your letter dated April 22, 1988 provided the subject test results. Subsequent submittals dated August 18, 1988 and September 2, 1988 provided clarification of the acceptability of the test results.

We have reviewed the test results and your letter of August 18, 1988 and agree with your conclusions regarding the adequacy of the Block Valve motor operator torque capability. Accordingly, we have no further concerns regarding TMI Action Item II.D.1 for Millstone Unit 2 and TMI action Item II.D.1 is resolved.

Sincerely,

original signed by

David H. Jaffe, Project Manager
Project Directorate I-4
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulation
