March 21, 1969

G. S. Spencer, Senior Reactor Inspector
Region V, Division of Compliance

PACIFIC GAS AND ELECTRIC COMPANY (DIABLO CANYON UNIT NO. I)
DOCKET NO. 50-275

The attached report contains the details of our recent visit to the site of the proposed subject facility on March 11, 1969.

Based on our observations and information obtained from the applicant personnel, the tentative schedule for the start of construction of the containment buildings appears to be a reasonable forecast. Also, of interest, was an apparent sincere concern on the part of the applicant personnel relative to required quality control programs. If this expressed attitude continues, we can expect a favorable working relationship with the onsite personnel.

A. D. Johnson
Reactor Inspector
